**Subject:** Re: Have your say on firearms amendments

All gun owners should undergo a psychiatric assessment before purchasing a gun or having one at home. Mainly to prevent self harm or killing people in the future due to a mental health disorder.

Dear Mark

We're cracking down on people who threaten Tasmanians' safety through their illegal or unsafe behaviour with firearms.

[Last week the Government opened consultation on the \*Firearms Amendment \(Community Safety\) Bill 2023\*, and we want to hear from you Mark.](#)

**The proposed amendments will:**

- Automatically cancel and refuse firearms licences for members of outlaw motorcycle gangs;
- Automatically cancel firearms licences for people in possession of shortened firearms such as sawn-off shotguns;
- Prohibit the unlawful manufacture of firearms parts or ammunition through emerging technologies such as 3D printers;
